## A letter from a satisfied customer

In 1991 – 92 when we built our new house we had given the wood work of my house to Mr. Harishchandra.N Acharya who owns “Sri Kateel wood creations”

The entire wood work all the bed rooms, living room dining room kitchen and library etc was planned with care thought utility and esthetic sense. The whole work was executed for our requirement and immense satisfaction; most of the cabinets are made of pure teakwood and rosewood.

Even after 18 years, people who come to our house admire and appreciate the beauty and quality of the work and ask for the reference.

In recent years “Sri Kateel wood creations has expanded very much and they specialize in modular kitchens in addition to other wood works. They use quality materials, latest technology and provide excellent service.
